DETAILED ACTION

1. Lack of Unity

A. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-18 and 22, drawn to a PPAR ligand-binding domain, encoding nucleic acid, method of making said domain and method of use as well as a ligand-activated transcription factor.

In order to be fully responsive, Applicants must further elect a specific PPAR, or SEQ ID NO. (PPAR α , δ and γ , SEQ ID NO:3, 4, 5 or 6). In addition to a specific protein, the specific substitution recited in the claim must also be elected (all "X" amino acid variables must be specified) where applicable.

B. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
